Abstract (en)

Electrical resetting apparatus (10) adapted to be associated to a protection device (20) provided with a control lever (22) adapted to be actuated to electrically connect/disconnect an electric load circuit to/from a power supply network, the electrical resetting apparatus (10) comprising: - a resetting device (13,30,31,32), adapted to be connected to the power supply network, comprising a rotating resetting arm (13) adapted to mechanically cooperate with the control lever (22); - a control circuit (50) adapted to be connected to the electric load circuit to detect an operating state thereof in order to control said resetting device (13,30,31,32); - sectioning elements (c1,c2,c3) adapted to be actuated to acquire a first or a second operating state, for respectively connecting/disconnecting the control circuit (50) to/from the load circuit; - a control handle (11,12) rotatable around a rotation axis (R-R), adapted to be actuated to manually rotate the resetting arm (13).
