Abstract (en)

[origin: EP2384064A1] A method, a system, and an apparatus for enhancing uplink coverage capacity of a User Equipment (UE) are disclosed. The method includes: a NodeB receives information reported by a UE, instructs the UE to transmit uplink data by using a preset scheme after determining that the uplink transmit power of the UE is limited according to the information, and decodes received uplink data in a mode corresponding to the preset scheme.
