Abstract (en)
[origin: CA2750236A1] The present invention relates to a glove, in particular a sports glove, having a finger part comprising individual fingers and a mitten part attached to the back of the hand of the glove that can be drawn over the finger part. The object of the present invention is to design such a glove, so that the glove can be used in a wide range of temperatures and weather conditions, without reducing the wearing comfort of the glove with or without the mitten part drawn over. To this end, according to the invention, the mitten part is disposed in the rest position in a pocket formed in the area of the back of the hand of the glove.
