Abstract (en)

[origin: WO2010085999A1] The invention relates to a method for operating a hybrid vehicle, wherein a change from an internal combustion engine to an electric motor operating mode takes place at least in some operating conditions as a function of location information present along the driving route. Via a user interface, at least one piece of location information can be defined or selected, in the presence of which a change from internal combustion engine to electric motor operating mode is to be initiated.
