Abstract (en)
[origin: EP2384732A1] The button (1) has a surface (3) provided with plate ribs (4) in a projected manner and constituting of anti-skid elements, where the plate ribs are arranged in a set of series of ribs(5) evenly spaced around periphery of the surface. Each rib is formed in chevron shape with point directed to a central area of the surface. The series of ribs is adjacent to each other, so that assembly of an upper surface of the surface is covered by the ribs.
