Abstract (en)

[origin: EP2384852A2] The device comprises a knife magazine (6,7) for receiving a hand knife, a driven handling unit that is provided with a knife grip (5), and a sensor unit for partial collection of the contour of the knife edge. An electronic evaluation unit for evaluating the sensor data. A control unit is provided for controlling the machining motion. An independent claim is also included for a method for sharpening the knife edge of hand knives, particularly for meat processing.
