Abstract (en)

[origin: EP2384947A1] The method involves bringing a transport container into a position towards loading devices (9,10) of the loading areas (5,6) arranged section by section along the railway track (2). The transport container is hoisted by the loading device. The transport container is moved from a position next to the rail vehicle (8) into a position above the rail vehicle. The transport container is lowered to rail vehicle. An independent claim is also included for a device for loading and unloading of a mobile commodity incorporating transport container of a road vehicle on and from a rail vehicle.
