Abstract (en)
[origin: EP2385193A2] The closing device (1) has a door lock (2) cooperating with a locking plate (5), where an electrical load is assigned to the door lock. An electric line to the load comprises a line section ending in the locking plate and another line section ending in an element of the door lock. The element is retractable in an opening of the locking plate. Two element-sided contacts are in arrangement with two locking plate-sided contacts in the retracted position.
