Abstract (en)
A door handle includes a front surface part (41) and a side surface part (42) provided on an inner side chassis (40) forming one side surface of a refrigerator door (20) in the longitudinal direction, an inclined plane part (43) formed between the front surface part (41) and the side surface part (42) in the longitudinal direction, a handle part (44) formed on the inclined plane part (43) so as not to be deviated from the inclined plane part (43), and a handle member (50) provided with an opening formed in a shape corresponding to that of the handle part (44), and connected to the handle part (44).
