Abstract (en)

The method involves activating a ticket tag, in which an electronic terminal is held at the ticket tag particularly at a distance of less than 30 centimeters. An electronic ticket is generated by selecting the displayed ticket information associated with the ticket initial data by an output unit of the electronic terminal. The electronic ticket is transmitted by activating the marking tag, where the electronic terminal is held at the marking tag. The marked electronic ticket is received and stored by cancelling the marking tag. An independent claim is also included for a ticket terminal for cancelling an electronic ticket.

Abstract (de)

Die vorliegende Erfindung betrifft Verfahren zum Auswählen und Entwerten von elektronischen Tickets durch ein nahfeldkommunikationsfähiges elektronisches Endgerät, insbesondere durch ein Mobiltelefon. Ferner betrifft die Erfindung ein Ticketterminal zum Entwerten von elektronischen Tickets.
