Abstract (en)

[origin: WO2010078975A1] The invention relates to a nozzle closure (1, 20, 30, 40), in particular to a nozzle closure (1, 20, 30, 40) and to a method for closing a nozzle for dispensing material for a liquid film, comprising a base plate (2) with at least one through-hole (4) for connecting a material feed side (6) of the base plate (2) to a material dispensing side (8) of the base plate (2), and at least one cover plate (10) arranged at least partially on the material feed side (6) of the base plate (2), said cover plate having at least one first channel (12) for connecting a material feed of the cover plate (10) to a side (14) of the cover plate (10) facing the base plate (2), wherein the base plate (2) and cover plate (10) can be displaced relative to each other in order to open and close a connection between the material feed and the at least one through-hole (4) of the base plate (2).
