Abstract (en)

[origin: WO2010049648A1] The invention relates to a device for storing, baking, and automatically dispensing dough-based products capable of being baked, in particular bread, including an area for storing unbaked products and a baking and dispensing area with, in a lower portion thereof, an oven as well as a cart capable of providing the translation of a product from said storage area to a dispensing area, characterised in that the device includes a means (82) for dispensing the baked product pivotably mounted about a substantially horizontal axis so as to tilt said dispensing means (82) from a substantially horizontal position to a substantially vertical position.
