Abstract (en)
[origin: EP2386362A2] The method involves providing a flowable adhesive for a dosing device (1) in a storage container. The flowable adhesive is subjected to a pressure. The flowable adhesive is dispensed at an outlet channel of the dosing device by opening and closing a closure device for the outlet channel. The flowable adhesive, dispensed from the outlet channel, is applied on a surface. An independent claim is also included for an adhesive application device with an additional kit.
