Abstract (en)

The present invention relates to a packaging system for an apparatus having a predetermined geometric structure. The packaging system is provided for enclosing the apparatus (26) completely or at least partially. The packaging system comprises one or more packaging components (10), wherein the inner side of the packaging component (10) is adapted to the structure of the associated portion of the apparatus (26). At least one packaging component (10) comprises a plurality of blind holes (12) at an outer surface of said packaging component (10). The blind holes (12) are covered by at least one thermo shrinking foil (30), so that a plurality of air-cushions is formed. Further, the present invention relates to a method for packaging an apparatus.
