Abstract (en)
[origin: EP2386694A2] The system has a heat insulating unit (10) made of insulating material that is partially and organically formed from organic material. A multi-storage facade (16) is partially covered with the heat insulating unit, where height (14) of the multi-storage facade is 22 m. The insulating unit is formed as a heat insulating plate completely covering the multi-storage facade. The insulating material is formed as polyurethane foam and/or polyisocyanurate foam. A cleaning system is partially attached on a surface of the heat insulating unit that exhibits homogeneous gross density. An independent claim is also included for a method for production of a multi-storage building heat insulating system.
