Abstract (en)
[origin: WO2010083462A1] A pocket system for an athletic garment according to embodiments of the present invention includes a center pocket and first and second pockets each having an outer, inner, top, and bottom edge. The top edges are open, while the inner, outer, and bottom edges are closed. A vertical centerline of the garment substantially aligns with a user's spine, and the first pocket is located on the athletic garment on one side of the vertical centerline, while the second pocket is located on the garment on the other side of the vertical centerline. The first and second pockets are in a substantially symmetrical configuration about the vertical centerline, and the center pocket is substantially centered on the vertical centerline. The first, second, and center pockets are disposed entirely within a larger, outer pocket, according to such embodiments of the present invention.
