Abstract (en)

[origin: WO2010081636A1] The invention relates to a dishwasher, in particular a household dishwasher (1), comprising a washing container (2) which has a flange structure (8, 9) arranged on the outside, and comprising a base carrier (12) which has a laterally acting guide structure (14, 15), into which the washing container (2) is inserted from the top, wherein the flange structure (8, 9) comprises a retaining section (22) that is bent such that it interacts with a surface (23) of the guiding structure (14, 15) directed toward the bottom such that the washing container (2) is positively connected to the base carrier (12).
