Abstract (en)
[origin: EP2387930A1] The cleaning body (1) comprises a melamine resin foam and base body (10) which is provided with two sides (12,16), where one side has a profiled surface (14). The melamine resin foam comprises an open-cellular and abrasive foam material, where the profiled surface comprises a burl (18). The melamine resin foam has compression hardness, according to German institute for standardization (DIN) 53577 or International organization for standardization (ISO) 3386. An independent claim is also included for a method for mechanical cleaning of structured floor surfaces.
