Abstract (en)

[origin: EP2388113A1] The knife has a body provided with a housing to receive a blade (2), and a pusher (4) for driving a cutter bar (3) in longitudinal direction of an outlet of the blade. The pusher and the cutter bar are provided with disengaging units for disengaging a thrust bearing (5) from a counter thrust bearing (6) under action of rotation of the counter thrust bearing and the thrust bearing toward a inclined cutting position. The thrust bearing and the counter thrust bearing comprise curve engagement edges.
