Abstract (en)

[origin: EP2388136A1] The press (10) has printing devices (30, 40, 50) with a printing block for color separation of a color e.g. cyan, magenta, yellow, black. Block-less printing devices (60, 70) are provided for color separation of another color and are provided in the form of ink-jet printing devices or electrophotographic printing devices. The block-less printing devices comprise printing heads and a guide element i.e. guide roller, for a substrate (2) to be printed at a region of the color separation of the printing heads. The printing devices comprise an erasable printing block. An independent claim is also included for a method for printing a multi-colored print image.
