Abstract (en)

[origin: EP2388200A1] The device (1) has a drum (2) rotated about a predetermined rotational axis and a glue application unit for applying glue onto an external surface of the rotary drum. The glue application unit has a receiving space for receiving the glue and supply unit to supply the glue to the receiving space. A wall element is pressed against the external surface of the drum. An independent claim is also included for a method for applying glue onto labels for fixing at container.
