Abstract (en)
[origin: EP2388410A1] The walls of the swimming pool include a series of solid wooden or plywood boards stacked and assembled together by means of threaded studs that join matching drill holes made in the boards, assembled from the bottom (ground) to the top (rim of the swimming pool), the studs thereof being longitudinally aligned and spaced out along the stacked boards of each wall. Of the plurality of stacked boards that make up each wall of the swimming pool, one or more pairs of stacked and assembled boards have, on the opposite surfaces thereof, a series of matching longitudinal or transverse recesses or channels which house the longitudinal pipes and bends that accommodate the swimming pool water circulation and illumination elements to the swimming pool basin.
