Abstract (en)

[origin: WO2010072901A1] The invention relates to a method for separating particles in hydrous slurry (38) and to a hindered-bed separator. The method comprises a step for connecting at least one teeter water pipe (8) of a teeter water distributor means (7) of a hindered-bed separator in fluid connection with a teeter water discharging means (10), and discharging teeter water (9) from the at least one teeter water pipe (8) that is in fluid connection with the teeter water discharging means (10) to the teeter water discharging means (10).
