Abstract (en)

[origin: WO2010099961A1] The invention relates to a device and to a method for adjusting a blade clearance on a cutting device for slicing a product, in particular a food product (18), wherein the cutting device has a cutting blade (14) which can be rotatably driven in a cutting plane (12), a cutting edge (24) and an adjustment apparatus (28) by which the cutting blade (14) and the cutting edge (24) can be moved relative to each other perpendicular to the cutting plane (12).
