Abstract (en)

[origin: WO2010085791A1] A system and method is provided of generating a map (440). In one aspect, the map (440) is selected based on a location (410) provided by a user and listings (430) are selected based on their proximity to the location (410), whether they match a query provided by the user, and the number of matching listings within regions of the map (440).
