Abstract (en)

[origin: EP2390394A1] To provide a method for knitting a neckline portion capable of knitting a tubular knitted fabric having a deep neckline portion with a simple knitting step, and a tubular knitted fabric having a neckline portion knitted by applying such method. Flechage knitting is carried out with a left front body 52 and a right front body 51, divided by a boundary CL, connected to a back body. In the process, a stitch row (knitting needles 15, 13, 11, 9) of the front body 51 formed on the FB by forward knitting of the flechage knitting is moved in a direction of moving away from the boundary CL, and the stitch (knitting needle 9) most distant from the boundary CL in the stitch row is overlapped on the stitch (knitting needle 7) at the closest position from the boundary CL in a non-moved stitch row. A yarn is fed to an empty needle (knitting needle 15) made by the movement of the stitch row to form a pickup stitch configuring the neckline portion. The pickup stitch is remained held on the knitting needle of the FB until the formation of the neckline portion is finished.
