Abstract (en)
[origin: EP2390431A1] The invention relates to a drain, comprising: - a bottom surface; - a standing wall along the periphery of the bottom surface such that a tray is formed by the standing wall and the bottom surface; and - a horizontal flange extending from the upper edge of the standing wall; wherein a strip is arranged running peripherally along the standing wall in the formed tray, wherein the upper edge of the peripheral strip protrudes above the horizontal flange.
