Abstract (en)
[origin: EP2390436A1] The curtain wall (1) has a container (3) for example a container made from lattice bar mats. A spacer (4) holds a container in a defined distance to a building wall (2), such that a space (6) is formed between the building wall and the container. The space is partly filled with an insulating material (7). An independent claim is also included for a method for insulating a building wall with a curtain wall.
