Abstract (en)

[origin: EP2390439A2] The frame has an elongated vertical shaft (1) made from metal tube and a hollow profile. A hollow coupling profile is inserted into an end of the hollow profile, and a connection disk (3) is fastened to the vertical shaft. A pipe locking connector (4) has side pieces, and connected with a horizontally-running pipe lock (5). The connector is inserted into the connection disk through an edge opening (32), where the coupling profile is connected with the vertical shaft over connectors. Front sides of one of the side pieces lie on the shaft at an outer side of the connectors. An independent claim is also included for a method for assembling a module frame.
