Abstract (en)

[origin: EP2390447A2] A bracket (10 - 10') with front coupling for carriages (24) of sliding wings or doors (16) comprises a base (12) provided with through holes (14) for the fixing thereof by screws (13) to the top edge of said wings or doors; the base (12) centrally defines an extended raised portion (18) wherein a seat (20) is formed, which develops orthogonally relative to the longitudinal axis of the bracket (10) starting from an inlet (20') open on one of the opposite long sides of the bracket itself. The seat (20) is suitable for seating the bottom portion (23) of a pin (22) protruding from the bottom side of the frame (26) of each carriage (24).
