Abstract (en)

The present invention relates to a water container (10) for an oven cavity (20) of a cooking oven. The water container (10) is formed as a dish and comprises a ground plate (18) and a side wall (12) enclosing said ground plate (18). The water container (10) is made of a metal. The water container (10) is adapted to an embossing in a bottom part (22) of the oven cavity (20), so that a lower portion of the water container (10) is at least in sections complementary with said embossing (22). Further, the present invention relates to a cooking oven with an oven cavity (20) and a water container (10) for said oven cavity (20), wherein a bottom part (22) of the oven cavity (20) includes an embossing (22). Said embossing (22) is at least in sections complementary with a lower portion of the water container (10).
