Abstract (en)  
[origin: WO2010085981A1] The invention relates to an occlusion template 1 having position markers P comprising prescribed dimensions, applied to prescribed locations of the template 1, and recognizable as position marks on an image of the jaw or a jaw area of a patient. In order to be able to analyze locally limited X-ray images, the invention proposes that the template 1 comprises more than three position markers P1-P9, each disposed in the bite area of the template 1.
