Abstract (en)
[origin: WO2010085946A1] The invention relates to a method for producing a surface of a component, particularly a wooden surface, having a uniform appearance, wherein defective areas on the surface are detected and repaired by smoothing the damaged surface region. The repaired surface region is imprinted with a print image, wherein the visual design of the print image on the repaired surface region is adapted to the visual design of the adjoining surface region.
