Abstract (en)
[origin: WO2010086114A1] The invention relates to a multifunctional device for manufacturing marking labels (10), especially marking labels (10) for terminal blocks, which comprises a printing device, a separating device and/or a perforating device. Furthermore, the multifunctional device according to the invention comprises a feeding unit for unlabelled marking labels (10) from a finite or endless product and a receiving element (12) in which the marking labels (10) can be fixed as they pass the printing device, the separating device and/or the perforating device, wherein the marking labels (10) comprise a top side (14) that is to be printed and a bottom side (16) disposed opposite of the top side (14), the bottom side (16) having a profile (18). The multifunctional device according to the invention is characterized in that the receiving element (12) has a recess (20) in which the marking labels (10) with the profile (18) can be fixed when passing the printing device, the separating device and/or the perforating device.
