Abstract (en)  
[origin: EP2392230A2] The shelf (100) has cross members (104, 106) arranged opposite to each other and extended along a longitudinal direction (114). The cross members comprise a circulating profile whose side includes a superimposed fold (200) of the profile. The cross members are extended in a horizontal direction, where the superimposed fold of the profile is formed on horizontal surfaces (202, 206) of the profile. The cross members comprise a beveled edge (204) pointing downward towards other cross member. The former cross members comprise an aperture (210) for inclusion of resting of a shelf panel (108).
