Abstract (en)
A knitting method by which two adjacent stitches with a branch center line of a V-neck point interposed therebetween are prevented from being separated outward from each other and the strength of the branch portion is improved, and a knitted fabric knitted with such knitting method are provided. The method includes, regarding two adjacent stitches with a branch center line of the V-neck point interposed therebetween, changing a travel direction of a carriage from one to the other, and forming a miss stitch on a front side of the two adjacent stitches with respect to the traveling direction of the carriage and a knit stitch on the back side with respect to the traveling direction of the carriage; and interchanging and crossing positions of at least one of the two adjacent stitches and a stitch adjacent to the stitch.
