Abstract (en)
[origin: EP2392724A2] The domestic appliance has a drying area for drying of drying goods, particularly textiles, a loading door for loading and unloading the drying area and a door frame (54) for the loading door. An opening (541) is provided in the door frame for receiving an exhaust air stream from the drying area. A filter device is provided for separating particles from the exhaust air stream. Another filter device (3) is provided downstream of the former filter device in exhaust air direction. An independent claim is also included for a method for removing a filter device from a domestic appliance.
