Abstract (en)  
[origin: EP2392878A2] The present invention provides a directing element (1) for the household goods (C) comprising a carrier (2) which has at least one moving element (3) thereon, with the aim of the height adjustment of the carrier (2) without reducing the size and by preventing the abrupt movements of it. In an household good (C) comprising a directing element (1) which is fixed to at least one inner walls of its internal part, and which adjusts the height of the carrier (2) by means of the moving element (3) moving therein; the said directing element (1) comprises at least one upper channel (6) inclined upwards and at least one lower channel (6') inclined downwards in which the moving element (3) moves, and at least one joint area (8) where one each end of said channels (6, 6') meet and at least one curve (7) located on at least one of the said channels (6, 6'), in which the moving element (3) is seated.
