Abstract (en)
[origin: CA2751427A1] The invention relates to a device for storing and supplying medicament wafers (2) preferably used for contraception or hormone replacement therapy. Said device comprises a stack (1) of medicament pouches (4) used for storing and supplying the medicament wafers (2). First zones (10) of the medicament pouches (4) have mutually flush openings (8). The device further comprises at least one connection element (9) which penetrates the openings (8), interconnects the medicament pouches (4), and allows the pouches (4) to be moved relative to each other.
