Abstract (en)

[origin: WO2010089470A1] The invention relates to a thermal validation apparatus (302) including at least one lining (316), each lining defining a sink (314) and intended to be inserted into a respective recess of the thermal processing device for heating or cooling biological samples, as well as a respective temperature probe arranged in each sink (314). Each sleeve is made of a plastic material.
