Abstract (en)

[origin: WO2010092608A1] A profile for a frame of an opening element such as a window, a door, or the like comprises an inner structure (20) composed of at least one layer (7, 8, 9) of wood material and a covering (13, 14) which can impart a predetermined appearance, applied to at least one surface of the inner structure, and a layer of water-repellent material (12) interposed between the inner structure (20) and the covering (13, 14).
