Abstract (en)
[origin: WO2010089176A2] A vertically adjustable tray for refrigerated goods of a refrigeration appliance comprises a drive lever (16) that can be moved back and forth and a ratchet mechanism (31-36) for driving the vertical adjustment. The drive lever (16) can be moved between a center position and a first stop position for driving an upward movement and between the center position and a second stop position for driving a downward movement of the tray (4) for refrigerated goods, which second stop position is opposite the first stop position.
