Abstract (en)

[origin: WO2010089488A1] The invention relates to a method for merging segments of an audiovisual stream previously clipped into a plurality of program segments to be merged. According to the invention, such method includes, for at least one first and one second segment from said plurality of segments, a step of computing a set of descriptors, and includes a step of obtaining at least one piece of information representative of the fact that said at least one first and said at least one second segments belong to a same audiovisual program on the basis of data representative of said previously computed descriptors.
