Abstract (en)

A foldable chair capable of being overlapped with other chairs vertically comprises two front legs, two rear legs and a seat plate. An inner side of each front leg has a recess for assembling the rear leg and a T shape buckle; each of two sides of a top end of an outer side of each rear leg has a post for assembling the seat plate; and each of two outer ends of a rear side of the seat plate has a C shape tenon which can be assembled to the T shape buckle at the inner side of the front leg; and each of two ends of an inner side of the seat plate has a sliding groove for assembling the post of the rear leg. The chair can be assembled without screws, but it still has a firm structure and the assembly work can be positioned quickly and easily.
