Abstract (en)

[origin: EP2394549A2] The appliance (1) has a drive (6) for driving a stirring unit (5) in a stirred vessel (4), where a lower region of the vessel is heatable. An adjustment unit automatically adjusts stirring phases by stirring interrupting phases with respect to speed, where reduced speed is determined according to measuring data corresponding to the vessel, cooked food in the vessel or a drive of the stirring unit. The adjustment unit automatically adjusts heating phases by heating interrupting phases with respect to heat output. The stirring unit is provided with a lifting arm (15). An independent claim is also included for a method for operating a kitchen appliance.
