Abstract (en)  
The present invention relates to a machine for cleaning and drying of glasses, being particularly applicable to glasses of difficult cleaning, which comprises a lower base structure (6) to the engine housing (1), whose vertical axis, attached to the axis of the central gear-wheel of the set of gear-wheels (4) that act as basis to the support axis (7) of the chamois leather brushes for cleaning (2, 3) that when in rotary motion open and create the ideal environment for cleaning throughout the interior and exterior surface of the glass, an exterior box that protects the user from eventual breaking of glass, a lid on the top of the machine, which works as a switch turning on or off as the engine is shut or open respectively.
