Abstract (en)

The dishwasher rack (A) of the invention comprises at least one shelf (2) hinged to the rack wires (1) and at least one connecting member (3) which establishes the connection of the shelf (2) to the wires (1). The shelf (2) is rotatably foldable and is also horizontally or vertically slidable. In addition, said shelf (2) is provided with at least one track (4). The connecting member (3) is fitted into the track (4) from the top surface (7) as a freely moveable member, and comprises at least one protrusion (6) which is wider than the track (4) provided on the end of the connecting member (3) remaining under the shelf (2). The connecting member (3) is hinged to the wire (1) by the other end thereof.
