Abstract (en)  
[origin: EP2394907A2] The suit (4) has a connection unit for connecting an inflatable buoyancy body or an artificial respiration device to a difficult breathing air system (14) of a submarine, where the buoyancy body is supplied with air. An air supply line is led into an interior part of the suit, where a connection for the difficult breathing air system and a mouthpiece are arranged at an end of the supply line. The air supply line is formed elongatedly such that the connection for the difficult breathing air system is provided in hand region of a user of the suit.
