Abstract (en)

The device (10) has a handle unit (20), and a fastening unit (46) for detachable attachment of a container (12) to the handle device. Another fastening unit (50) detachably fastens another container (14) at the handle device. The latter fastening unit is detachably fastened to the handle device by a screw connection (52). The latter fastening unit possesses two profile units, which are detachably attached together by a screw-spring connection. The latter fastening unit comprises a dove-tail groove and a dove-tail spring. An independent claim is also included for a container for detachable fastening to a handle device, comprising a fastening element.
