Abstract (en)

[origin: EP2394931A1] The present invention relates to a reclosable container (2) for sterilised products (5) or with low bacterial load free of preservatives, suitable for limiting and/or reducing the growth of microorganisms within said products (5) during the usage thereof, characterised in that the inner surface (6) of said container (2) that may come to contact with said product (5) is made of a thermoplastic resin comprising an antibacterial composition. The present invention further relates to a closing element (3) associable to said container (2) and to a primary packaging device (1) formed by said reclosable container (2) and by the relative closing element (3) associable thereto.
